

# Tracey Gillespie, DVM, DACVIM-SAIM

## Tracey Gillespie, DVM, DACVIM-SAIM

Dr. Tracey Gillespie joined IndyVet in the summer of 2011 and is enjoying her return to clinical practice.

Dr. Gillespie completed her veterinary degree at Purdue University in 1997. After a private practice internship and a year of emergency medicine in New Jersey, she completed her residency in internal medicine at the University of Pennsylvania in 2001 and became board certified in 2003. She joined a surgical referral hospital and built an internal medicine practice in Memphis, Tennessee where she practiced for 7 years, receiving the Memphis – Shelby county, Veterinarian of the Year award from her referring colleagues in 2007. In 2008, she joined IDEXX labs as a consultant for the reference laboratory.

Dr. Gillespie, leads the internal medicine service and strives to provide exceptional compassionate care to critical patients. She diagnoses, manages, and treats a wide range of endocrine, metabolic, cardiac, renal, neurologic, hepatobiliary, autoimmune and GI diseases. Her extensive experience in abdominal, thoracic, and cardiac ultrasonography allows her to provide comprehensive patient care and diagnosis. Our internist along with a team of dedicated and specialized nurses provide around the clock care for the sickest patients in our hospital.

Emergency & Specialty Hospital

Where care comes first.

# Internal Medicine

All IndyVet specialists have received four or more years of post-doctorate training prior to board certification. This training and experience allows our specialists to manage and treat a wide variety of complex diseases and conditions in collaboration with general practitioner colleagues across the state of Indiana. This collaborative approach to case management allows us to provide the most versatile care available.

The establishment of IndyVet Internal Medicine as a separate clinical department occurred in 2011 in order to deliver better and more efficient care to patients. The goal of internal medicine at IndyVet is to provide compassionate and comprehensive care to our patients, their families, and to referring veterinarians. Each doctor in the internal medicine department has worked in the general practice sector and understands the supportive and collegial relationship desired by practitioners. Our objective is to retain patients only as long as required to identify and resolve the initial crisis, and to then work in conjunction with, or through the referring veterinarian on follow up care.

## Some of the Internal Medicine Procedures Commonly Performed at IndyVet.

### Diagnostics

- Computed Tomography
