

Julie Trzil, DVM, MS, DACVIM-SAIM

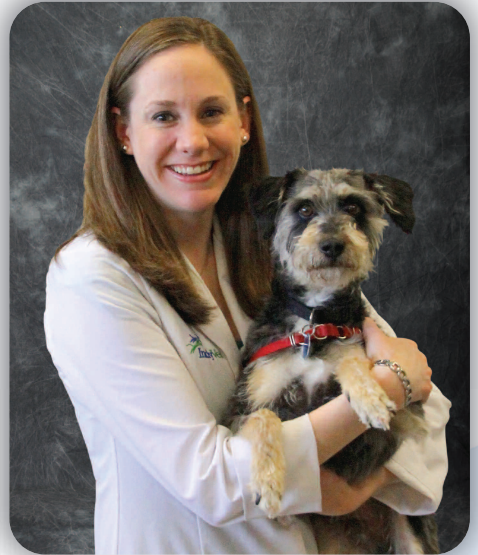

Julie Trzil, DVM, MS, DACVIM-SAIM

Dr. Trzil always wanted to be a veterinarian since she was a little girl. As a girl scout in grade school she developed an effective community service project to raise awareness for the importance of spaying and neutering pets! Dr. Trzil remained passionate about veterinary medicine and never lost sight of her goal through high school or her undergraduate college education.

Dr. Trzil graduated from Rhodes College in Memphis Tennessee with a major in biology in 2005 and was accepted to the University of Tennessee College of Veterinary Medicine where she received her veterinary medical degree in 2009. After graduation, she completed a rotating internship in veterinary medicine and surgery at Texas A&M University in 2010 and an internal medicine specialty internship at Memphis Veterinary Specialists in 2011. Dr. Trzil was then accepted into a small animal internal medicine residency at the University of Missouri. Dr. Trzil completed her residency along with a concurrent Master's degree in biomedical sciences in 2014 where she received the prestigious Redhage Award presented to residents for excellence in strong client/patient relationships with excellence in medicine.

Dr. Trzil enjoys treating a wide range of internal medicine disorders including liver, kidney, infectious, autoimmune, and hormonal diseases, while maintaining a special interest in respiratory and gastrointestinal diseases. She endeavors to provide the highest quality medicine and compassionate care while considering the interests and needs of the pet and the entire family.

When Dr. Trzil is not caring for animals, she enjoys spending time with her husband, Ben, and her calico cat, Nikki. She also enjoys hiking, painting, and bowling.

Where care comes first.

Internal Medicine

All IndyVet specialists have received four or more years of post-doctorate training prior to board certification. This training and experience allows our specialists to manage and treat a wide variety of complex diseases and conditions in collaboration with general practitioner colleagues across the state of Indiana. This collaborative approach to case management allows us to provide the most versatile care available.

The establishment of IndyVet Internal Medicine as a separate clinical department occurred in 2011 in order to deliver better and more efficient care to patients. The goal of internal medicine at IndyVet is to provide compassionate and comprehensive care to our patients, their families, and to referring veterinarians. Each doctor in the internal medicine department has worked in the general practice sector and understands the supportive and collegial relationship desired by practitioners. Our objective is to retain patients only as long as required to identify and resolve the initial crisis, and to then work in conjunction with, or through the referring veterinarian on follow up care.

Some of the Internal Medicine Procedures Commonly Performed at IndyVet.

Diagnostics

- Computed Tomography
- Endoscopy
- Ultrasound
- MRI

Therapeutics for

- GI & Hepatic Diseases
- Cardio-Pulmonary Diseases
- Neurology
- Kidney & Urinary Tract Diseases
