

Specialty Scheduling

Patients referred to an IndyVet specialist are seen by scheduled appointments. If your veterinarian would like to refer you the same day or after hours, our facility can accommodate you if more immediate care is needed.

If a specialist is not immediately available, pets may be seen and examined by the emergency service. The emergency doctor on duty will contact the specialist for a consultation regarding your pet's condition and initial care. Patients are transferred to the specialist's care as soon as practical.

Occasionally patients may need to be sedated for radiographs or tests during your specialty appointment. We ask you not feed your pet within 12 hours of scheduled appointments to make sedation safer.

Our Mission

To provide the highest standards of medical care for our patients, their families, and the referring veterinary community in a professional and compassionate environment.

Our Goal

To be a resource and a partner for referring veterinarians. We understand how important it is for primary care veterinarians to remain involved in the care of their patients. We strive to work as an extension of their practice.

Our Team Approach

Our specialists work together to coordinate the best diagnostic and treatment options for each patient. All members of the IndyVet staff—from the receptionists to the technicians and veterinarians—are trained and committed to providing superior service.

Proud to be Fear Free Certified, one of only **THREE** emergency and specialty veterinary hospitals in the U.S. to earn the Fear Free Emergency Certification!

We're Here 24/7

Members of our ER team are here 24/7 to ensure the best possible care day or night.

They are trained to address unlikely or unexpected medical or surgical circumstances & provide exceptional client services in addition to their outstanding patient care.

Committed to Quality Care

Upon arrival, each patient's history is reviewed by a doctor prior to performing a detailed examination. Each ER doctor has the ability to collaborate with other specialists as needed in order to provide the best care possible within the financial means of the client.

Each client is treated with kindness, sensitivity and empathy. We understand that this can be an anxious time for clients and we aim to make each visit comfortable and efficient.

IndyVet is an American Animal Hospital Association accredited hospital. The AAHA is the only organization that inspects and accredits veterinary practices in North America.
